Genaire Limited Has Purchased Former Military Camp Building

SUBSIDIARY "ROTAIRE" WILL OVERHAUL HELICOPTERS AT NIAGARA

for Niagara to gain this new industry.

The Niagara Town and Township Chamber of Commerce has been successful in arranging the sale of the Canadian Cannery camp building to Genaire Limited.

The plant will be put into operation immediately, as the present storage contents are now being removed. Their first operation will be the repair and overhaul of a recently-acquired fleet of helicopters, which have arrived via New York Central Railway. This work will be carried out by "Rotaire", a Genaire Ltd. subsidiary, which specializes in maintenance repair overhaul and engineering of helicopters. This project may lead to a Helio Port at Niagara-on-the-Lake, although the officers at Genaire Ltd. are not in a position, at present, to know if this fleet of helicopters will be based here. This industry will help to retain the railway facilities in the area.

The locating of this industry was made possible by the co-operation of the Niagara Town and Township Chamber of Commerce, the Town of Niagara and the Canadian Cannery and Genaire Ltd.

The members of the Chamber of Commerce appreciate the great co-operation which made it possible
